Technical Workbook

Hello Again!

Design is the art of making a beautiful and effective user experience. Development is the wizardry of translating these images into fully functional, cross-device, cross-browser code.

This workbook gathers the technical details needed to best translate the final code from design file to launch. With a completed workbook we will understand your unique details, which will help us craft a successful pre and post launch gameplan.

Tired of homework? As long as you know this information we're all set. Our expert development team can capture this information by phone or in person if it would be a better fit.

Hosting & Domain Name

In order for your finished site to go live, we'll need some information regarding where you'll be hosting your site and the domain name you'd like to use.

Where will the site
be hosted?

Cubicle Ninjas will host

Other, noted below

If hosting with Cubicle Ninjas, please skip the next three questions.

What are the
FTP credentials?

What are the
database credentials?

What are the
hosting control
panel credentials?

Is this a new or existing
domain name?

New Domain

Existing Domain

Who owns or controls
the domain name?

What are the
credentials for the
domain name?

Would you like
Cubicle Ninjas
assistance in pointing
the domain name to
your web host?

Yes

No

Service Integration

If you use any services such as marketing automation, email software, or CRM tools, we are happy to integrate them into your website.

What integration do
you need?

How do you need the
integration to work?

Please share an invite
to this system to
Hello@cubicleninjas.com
or enter access
information below.
