Technical Requirements Workbook

Hello!

Design is the art of making a beautiful and effective user experience. Development is the wizardry of translating these images into fully functional, cross-device, cross-browser code.

This workbook gathers the technical details needed to best translate the final code from design file to launch. With a completed workbook we will understand your unique details, which will help us craft a successful pre and post launch gameplan.

Tired of homework? As long as you know this information we're all set. Our expert development team can capture this information by phone or in person if it would be a better fit.

Hosting & Domain Name

In order for your finished site to go live, we'll need some information regarding where you'll be hosting and the domain name you'd like to use.

Where will this experience be hosted?

Cubicle Ninjas will host

Other, noted below

Other:

If hosting with Cubicle Ninjas, please skip the following section.

What are the FTP credentials?

What are the database credentials

What are the FTP credentials?
